

Technology Pioneer: AQT Awarded by World Economic Forum

- ✓ The World Economic Forum announced its selection of over 100 of the most **promising Technology Pioneers of 2020**, who are shaping industries from agriculture to healthcare while also working on sustainability issues and much more.
- ✓ Many Technology Pioneers are also using their tech to support COVID-19 responses around the world.
- ✓ AQT is developing the first **general-purpose quantum computer** based on trapped ions.
- ✓ The full list of recognized Technology Pioneers can be viewed here <https://widgets.weforum.org/techpioneers-2020/>

Innsbruck, 16 June 2020 – AQT, the Innsbruck-based Austrian quantum computing company, was selected among hundreds of candidates as one of the World Economic Forum’s “Technology Pioneers”. AQT is a spin-off of the University of Innsbruck and the Austrian Academy of Sciences, founded by the quantum physicists Prof. Rainer Blatt, Dr. Thomas Monz and Prof. Peter Zoller. The company develops hardware for quantum computers based on trapped-ion technology.

The World Economic Forum’s Technology Pioneers are early to growth-stage companies from around the world that are involved in the design, development and deployment of new technologies and innovations, and are poised to have a significant impact on business and society. Technology Pioneers community is an integral part of the larger Global Innovators community of start-ups at the World Economic Forum.

Following its selection as Technology Pioneer, CEO Thomas Monz of AQT will be invited to participate at World Economic Forum activities, events and discussions throughout the year. AQT will also contribute to Forum initiatives over the next two years, working with policymakers and private sector leaders to help define the global agenda on key issues.

“We’re excited to welcome AQT to our 20th cohort of Technology Pioneers. AQT and its fellow pioneers are developing cutting edge technologies all over the world. Beyond their innovations, these firms are contributing greatly to improving the state of the world.”

Susan Nesbitt, Head of the Global Innovators Community, World Economic Forum

“We are delighted to be acknowledged as pioneer by the World Economic Forum. This is a confirmation that our ion-trap technology is a top contender for a future quantum computer that can tackle meaningful, real-world problems. Our technology will support the development of new pharmaceuticals or materials with designed properties. Better catalysts, for instance, could curb emissions and help fight climate change. We look forward to contributing to the Forum dialogues on this challenge.”

Thomas Monz, CEO, AQT

This year’s cohort selection marks the 20th anniversary of the Tech Pioneers community. Throughout its 20-year run, many Technology Pioneers have continuously contributed to advancement in their industries while some have even gone on to become household names. Past recipients include Airbnb, Google, Kickstarter, Mozilla, Palantir Technologies, Spotify, TransferWise, Twitter and Wikimedia.

2020 Tech Pioneer firms are shaping the future by advancing technologies such as AI, IoT, robotics, blockchain, biotechnology and many more. The diversity of these companies extends to their leadership as well, as over 25% of 2020 Tech Pioneers are female led. The firms also come from regions all around the world, extending their community far beyond Silicon Valley. The full list of Technology Pioneers can be found on <https://widgets.weforum.org/techpioneers-2020/>

Technology Pioneers have been selected based on the community’s selection criteria, which includes innovation, impact and leadership as well as the company’s relevance with the World Economic Forum’s Platforms <https://www.weforum.org/centres/>.

About World Economic Forum: The World Economic Forum, committed to improving the state of the world, is the International Organization for Public-Private Cooperation. The Forum engages the foremost political, business and other leaders of society to shape global, regional and industry agendas. (www.weforum.org).

About the Global Innovators:

The Global Innovators community <https://initiatives.weforum.org/innovator-communities/globalinnovators> is a group of the world’s most promising start-ups and scale-ups that are at the forefront of technological and business model innovation. The World Economic Forum provides the Global Innovators Community with a platform to engage with public- and private-sector leaders and to contribute new solutions to overcome current crises and build future resiliency.

Companies who are invited to become Global Innovators will engage with one or more of the Forum’s Platforms, as relevant, to help define the global agenda on key issues.

AQT ALPINE QUANTUM TECHNOLOGIES GMBH

AQT is a spin-off of the University of Innsbruck and the Austrian Academy of Sciences, founded by quantum physicists Rainer Blatt, Thomas Monz, and Peter Zoller. The company develops hardware for quantum computers based on ion trap technology. AQT offers its customers the opportunity to work with conceptual test programmes. This enables their employees to qualify and position themselves for work with quantum computers at an early stage.
